Continuation of 4. Other: Newly submitted claims 146-181 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The original claims are directed to configuration system including interconnection networking wherein the claims detailed the interconnection networking to include routing and switching elements. However, the newly submitted claims are directed to heterogeneous computational elements and digital signal processing wherein the claims provide detail functionality of the digital signal processing which steered away from the original subject matter.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 146-181 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Therefore because the new submitted claims steered away from the original subject matter they are withdrawn from consideration and since the claims are withdrawn, there are no claims to examine. .
